

Year 3 Noticeboard : Term 2 - 2018

As you can imagine, this is a very busy term, as Christmas productions and parties arrive faster than seems possible. Please look out for notices via 'In Touch', our parent mail system, or letters home which will provide more details nearer the time.

In English this term we are working hard on punctuation and grammar. We will also be reading and reviewing books from popular authors and we will analyse and write our own instructions. To end the term, we will enjoy sharing Christmas poetry. Thank you for your support in helping your children to learn the spellings from their daily phonics group. We will continue to monitor their spelling progress over the course of the year, so please continue this at home, as well as hearing them read regularly (at least 5 times a week please).

In Maths we will be learning about addition, subtraction, multiplication & division, including doubling and halving, practising using times tables facts and solving problems. Please remember to help your child with practising their multiplication and division facts for their weekly tests. Thank you for your support.

Our Science topic this term will be Forces and Magnets. In D.T. we will be looking at pneumatic systems and creating our own moving monsters. If you have any unwanted boxes (cereal box size or smaller), they would be gratefully received.

If you would like to help with this activity or any other and have a valid DBS check, please discuss suitable times with your child's teacher.

Just to remind you that you can check the school website for our year group blog each fortnight, telling you all the exciting things we have been up to!

Many thanks,

The Year 3 Team:

Claire Owen, Liam Crook, Holly Smith and Vicki Walter
