

# The Five Principles of Counting

Please see the blog on the Nursery section of our school website for more information and as always, please contact us via email if you have any questions. If you are thinking it, someone else probably is too! The Nursery team 😊

## The One-One Principle

<https://video.link/w/ziF2b>

I can count each object only once and say one number name for each object.

## The Stable Order Principle

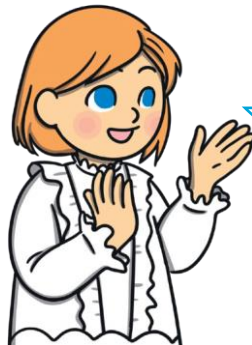

<https://video.link/w/tjF2b>

When I count, I say the numbers in order. This order always stays the same.

## The Cardinal Principle

<https://video.link/w/WjF2b>

When I count the objects in a group, the last number I say tells me the total for the group.

## The Abstraction Principle

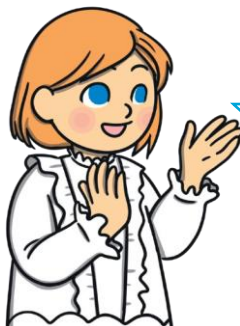

<https://video.link/w/lkF2b>

I can count anything. Even things that cannot be touched or seen.

## The Order-Irrelevance Principle

<https://video.link/w/BIF2b>

It doesn't matter which order I count a group of objects in, the total will be the same.
